# STAINES

## URBAN SANITARY AUTHORITY.

---

### TO THE CHAIRMAN AND MEMBERS.

---

GENTLEMEN,—

I hereby send the Annual Report for the year 1893 of the sickness and mortality of the Parish of Staines, being the Urban Sanitary District of the Staines Union.

The area of the Parish is 1,842 acres of land and 74 acres of water.

The population is estimated at 5,144.

The number of births registered is 151, being an increase of 13 on those of 1892—boys, 78 ; girls, 73.

The deaths for the year are 94, including 2 from the Workhouse, which is situated in the Parish of Stanwell. In 1892 the deaths numbered 72.

The death-rate per 1,000 of the population is 18·27 ; in 1892 it was 14·11.

I think by an analysis of the causes of death it will be seen that the increase did not arise from any especially preventible causes.

# NOTIFICATION OF INFECTIOUS DISEASES, 1893.

Date.	Name.	Locality.	Disease.	Result.
Jan. 27	W.R.	Providence Cottages	Membranous Laryngitis	Died

State here whether "Notification of Infectious Disease" is compulsory in the District, Yes; Since when? 1890. State here the name of the Isolation Hospital used by the sick of the District. Mark (H) the Locality in which such Hospital is situated; and if not within the District, state where it is situated. *There is no Hospital for the Isolation of the Sick of the District.* I have no means of ascertaining the ages of notified cases of sickness as there is no column for age on the Certificate.
